

A. Data sources, panel construction, and sample flow

Panel construction: 190 countries $\times$ 23 years (2000-2022) = **4,370 country-years**
Sample flow: exclude aggregate entities $\rightarrow$ **4,304** complete-case country-years
(189 countries; Somalia excluded) $\rightarrow$ +governance controls **4,098** $\rightarrow$ non-missing tax revenue (IV-2SLS) **2,753**

B. Analytical framework

Key findings: LIC $\beta = +0.85$ (bootstrap- t $p = 0.065$) | OOP down 11% per pp GHE (path $\alpha \beta = -0.120$) | TWFE $\beta = -0.12$ ($p = 0.077$)
